SIBI SIDDHARTH S

sibisiddharth8@gmail.com | +91 9629124660 | sibisiddharths | Coimbatore, Tamil Nadu | sibisiddharth8 | My Portfolio |

Profile

A passionate tech enthusiast skilled in Full-Stack Development (MERN stack, Firebase), Artificial Intelligence (AI), and Machine Learning (ML). Experienced in building user-focused web applications with optimized design and functionality. Strong problem-solver with a commitment to continuous learning and collaboration.

Professional Skills

Frontend Development: HTML, CSS, JavaScript, ReactJS, ViteJS, Bootstrap, Tailwind

Backend Development: Node.js, Express.js, Flask

Database Management: MongoDB, Firebase, Prisma

Programming Languages: JavaScript, Python

Version Control & Collaboration: Git, GitHub

Other Skills: SEO, Hosting, Artificial Intelligence (AI), Machine Learning (ML), ChatGPT, Canva

Experience

- **izet e-payments pvt ltd** — Feb 2025 - May 2025

Role : Software Developer intern

Key Contributions :

- Developed and delivered a complete full-stack ticket management application, which was adopted for internal use by the company.
- Engineered core functionalities including role-based user authentication, management systems for staff and retailers, and comprehensive ticket lifecycle tracking.
- Successfully deployed the backend on Railway and the frontend on Netlify, ensuring a scalable, reliable, and smooth user experience.

Key Skills Gained : MongoDB, Express.js, Node.js, Vite.js, API Design & Development, Database Management (Prisma with MongoDB), Tailwind CSS, Git, GitHub, Railway, Netlify.

- **Rotaract Club of Coimbatore Royals** — Jul 2024 - Present

Role : Club Service Director

Key Contributions :

- Managing and Organizing Club Service Projects.
- Documentation of Club Service Projects and records.

Key Skills Gained : Communication, Leadership, Networking, Conflict Handling, Documentation, Organizing, Resource Management, Time Management.

- **Rotaract Club of Kathir College of Engineering** — Jan 2024 - Jun 2024

Role : International Service Director & Social Media Manager

Key Contributions :

- Managing and Organizing International Service Projects.
- Maintaining timely updates of linkedin handle.
- Designing Posters using Canva.
- Documentation of the events, linkedin posts and event posters.

Key Skills Gained : Documentation, Leadership, Canva, Team Work, Organizing, Resource Management, Time Management.

Projects

- **TextEvolve - Turn ink into intelligence** Mar 2025 - present

Technologies Used : MongoDB (with advanced search & indexing), Node.js, Express.js, Python, Flask, Prisma, Vite.js, Tailwind CSS, Socket.io, Google Vision API, Azure Vision API, Git, GitHub, Render, Hostinger VPS, GitHub Pages, Custom .in Domain.

Description :

TextEvolve is an intelligent platform developed to convert handwritten documents into editable, searchable, and digitized formats. The primary goal of this project is to unlock and preserve information from legacy documents using advanced OCR technology, AI-driven enhancements, and collaborative features. The system features a dual-backend architecture: Node.js and Express.js for fast application-related APIs, and Python with Flask for AI-specific tasks. The frontend is hosted on GitHub Pages, with backend infrastructure hosted on Hostinger VPS.

Responsibilities :

- Spearheaded full-stack development, delivering user authentication, document management, and advanced OCR capabilities leveraging Google Vision, Azure Vision, and custom ML models.
- Engineered AI-driven enhancements for digitized text and source images, and integrated Socket.io for real-time document synchronization.
- Implemented core product features including language translation, user analytics, version history, and a comprehensive user dashboard.

Achievements :

- The project was shortlisted in the top 1000 teams as part of the "Naan Mudhalvan Niral Thiruvizha 2.0" initiative.
- Successfully developed TextEvolve into a feature-rich product for comprehensive document digitization.

- **Izet Ticket Management Application** Feb 2025 - May 2025

Technologies Used : MongoDB, Node.js, Express.js, Prisma, Vite.js, Tailwind CSS, Git, GitHub, Netlify, Railway.

Description :

Developed a full-stack ticket management application during my internship at izet e-payments pvt ltd. This application was designed to streamline the process of raising, managing, and resolving support tickets. It features multiple login types catering to different user roles (e.g., staffs, admins) and includes modules for managing staff, retailers, payments and the complete ticket lifecycle. The backend is deployed on Railway, and the frontend is hosted on Netlify.

Responsibilities :

- Undertook the full-stack development of the ticket raising and management application.
- Developed ideas and features for management of staff accounts, admin accounts, retailer information, payment details and support tickets.
- Deployed the backend services on Railway for scalability and the frontend application on Netlify for global accessibility

Achievements :

- Successfully developed and delivered the complete ticket management application from scratch, exceeding the typical expectations for an intern.
- The application was adopted and implemented by izet e-payments pvt ltd for their internal ticket management operations.

- **SpotGPT - Ad-Free Personal Music Streaming Application** Dec 2024 - Jan 2025

Technologies Used : MongoDB, Express.js, ReactJS, Node.js, Tailwind CSS, Cloudinary, Railway, GitHub.

Description :

SpotGPT is an ad-free Personal music streaming platform that includes a portal for uploading and managing songs, albums, and playlists. The backend is deployed on Railway for scalability, and the frontend is hosted on GitHub.

Responsibilities :

- Built a user portal for uploading and managing music content.
- Developed and deployed the backend API on Railway and hosted frontend on GitHub.
- Integrated Cloudinary for cloud storage and efficient media management.

Achievements :

- Delivered an uninterrupted, ad-free music experience.
- Ensured seamless deployment and smooth user experience with reliable cloud infrastructure.

- **MyMind - Personal Portfolio with Real-Time Data Management** Jul 2024 - Oct 2024

Technologies Used : ReactJS, Firebase, Tailwind CSS, Git, GitHub, Google Analytics, Microsoft Clarity.

Description :

MyMind is a personal portfolio with a dynamic portal to manage and update personal data in real-time. It integrates Firebase for database management and authentication, and uses Google Analytics and Clarity for tracking user behavior. Built with ReactJS and styled using Tailwind CSS, the site is responsive and version-controlled with Git, hosted on GitHub.

Responsibilities :

- Developed and designed a responsive portfolio website using ReactJS and Tailwind CSS.
- Integrated Firebase for real-time database management (via portal), and authentication.
- Implemented Google Analytics and Clarity for tracking user interactions and improving UX.

Achievements :

- Achieved 600+ views in 2 months on the portfolio, showcasing the visibility and reach of the project.
- Implemented Firebase Authentication and Realtime Database for secure and seamless updates.

- **FaceFusion - Advanced AI Face Enhancement & Swapping Tool** Jul 2024 - Aug 2024

Technologies Used : Python, TensorFlow, PyTorch, GFPGAN, ESRGAN, InsightFace, Git, GitHub.

Description :

FaceFusion is an advanced AI application designed for high-quality face enhancements and realistic face swaps. Utilizing cutting-edge models like GFPGAN, Real-ESRGAN, and InsightFace, it provides efficient and cost-effective visual effects solutions for film studios, content creators, and designers.

Responsibilities :

- Integrated AI models to deliver high-quality face enhancement and swapping functionalities.
- Developed algorithms for realistic face blending and detail preservation.
- Designed efficient workflows to optimize processing speed and resource utilization.

Achievements :

- Delivered an innovative tool that improved the efficiency and affordability of visual effects.
- Successfully implemented advanced AI models for realistic and seamless face swaps.

- **RoyalConnect2k24 - Official Website of RaC CBE Royals** Jun 2024 - Jul 2024

Technologies Used : ReactJS, Bootstrap, Git, GitHub.

Description :

RoyalConnect2k24 is the official website of the Rotaract Club of Coimbatore Royals. The site is fully responsive and optimized for desktop, tablet, and mobile devices. Built with ReactJS and styled using Bootstrap, it ensures a seamless user experience across all platforms. The website is hosted on GitHub for easy deployment and accessibility.

Responsibilities :

- Designed and developed a responsive website using ReactJS and Bootstrap.
- Optimized the site for performance and accessibility across various devices.
- Managed version control and deployment through GitHub.

Achievements :

- Delivered a professional, user-friendly official club website, enhancing the club's online presence.

- **Vision SoC - An Image upscaler Model** Apr 2024 - May 2024

  Technologies Used : Python, Flask, ESRGAN, TensorFlow, Keras, HTML, CSS, Javascript, Git, GitHub.

  Description :

  VisionSoC is an advanced image upscaling application that leverages ESRGAN to dramatically enhance image quality. It ensures exceptional clarity and preserves intricate details during the upscaling process. The application is designed for efficient and lossless image processing, with plans for future integration with satellite imagery for geospatial analysis.

  Responsibilities :

  - Developed the web application frontend using HTML, CSS, and JavaScript.
  - Built the backend using Python and Flask for processing and serving upscaled images.
  - Implemented ESRGAN for high-quality image upscaling with lossless detail preservation.

  Achievements :

  - Delivered a functional upscaling application with superior image clarity and detail retention.
  - Laid the groundwork for future applications in satellite image analysis.

- **Varunah2K24 - Official Symposium Website of KCE** Feb 2024 - Mar 2024

  Technologies Used : HTML, CSS, Bootstrap, JavaScript, AJAX, Netlify, Git, GitHub.

  Description :

  Designed and developed the official website for the One Day National Level Technical Symposium hosted by Kathir College of Engineering for the academic year 2024-2025. The website features intuitive navigation, comprehensive event details, user-friendly registration forms, and interactive elements optimized for desktop and mobile users.

  Responsibilities :

  - Developed a responsive and visually engaging website using Bootstrap 5.0.
  - Incorporated AJAX for dynamic content loading to enhance user experience.
  - Hosted the website on Netlify, ensuring seamless accessibility and performance.

  Achievements :

  - Successfully implemented a dynamic, user-friendly platform that recorded over 350 registrations, significantly contributing to the event's success.

- **ChatSoC - an AI Powered Chatbot** Mar 2023 - May 2023

  Technologies Used : Python, OpenAI API, DALL·E, OpenCV, Natural Language Processing (NLP), Git, GitHub.

  Description :

  ChatSoC is an AI-powered chatbot that engages in human-like conversations and offers additional functionalities through APIs and natural language processing. Key features include a QR login mechanism, AI-generated images via DALL·E, YouTube video downloader, and advanced image processing using OpenCV.

  Responsibilities :

  - Developed backend logic using Python to power chatbot functionalities.
  - Integrated OpenAI API for conversational AI and DALL·E for AI-generated image capabilities.
  - Developed a QR login system for secure user access and integrated a YouTube video downloading feature.

  Achievements :

  - Successfully integrated advanced AI features, boosting user engagement and chatbot functionality.
  - Enabled seamless generation of AI images using DALL·E.

Education

- **B.Tech Artificial Intelligence and Data Science**

  Kathir College of Engineering (2021 - 2025)

  CGPA : 8.19

- **Higher Secondary Education**

  Kovai Public School (2019 - 2021)

  Grade : 71.20%

Certifications & Credits

- **HTML, CSS, and Javascript for Web Developers -** Coursera.
- **ReactJS -** Coursera.
- **Generative AI with Large Language Models -** Coursera.
- **Python Essentials 1,2 -** Cisco Network Academy.
- **Machine Learning Algorithms -** GreatLearning.
- **Deep Dive into Deep Learning -** Scaler.
- **Disaster Risk Monitoring Using Satellite Imagery -** NVIDIA.
- **Deep Learning with PyTorch : Siamese Network -** Coursera.

Non Technical Skills

- Consistency
- Logical Thinking
- Problem Solving
- Team Player
- Time Management
